

Unit 23: Safe use of veterinary medicines

Teacher's notes

Introduction

This session summarises the key points in the safe use of veterinary medicines.

It will focus on the need for, and use of medicines, and the golden rules of injecting.

Numerous web sites especially the HSE and the NPTC assessment schedule provide excellent resources.

Theory is important, but as in any practical vocation, it is essential that the learner can physically do the administering of different medicines.

Resources

- Factsheet
- Relevant websites. For individual conditions it is very important to view the websites
- Video clips from the practical units on this website
